

Dear Patients, My name is Sheryl Ho. I am 26
26 years old when I was discharged from hospital. My hobbies
are reading and playing piano I am quite an introvert person I was
studying Accountancy in Australia.

I had an accident in Australia. From what I heard, my
husband's car went into a drain after we sent friends to the
airport for their flight back to Singapore. I was asleep
all the way when I was in the Australian hospital. I was
brought to Tan Tock Seng hospital and then transferred to
its Rehab centre at AMK.

Before I was discharged, I can't move my hand and leg
Now I can get up from bed and wear my own clothes I can
walk By myself with a walking stick. I used to forget a lot
of things but I have learnt ways to help me to remember I have
problem looking towards the left side but now I can pay
more attention to the left I even play the keyboard in the
hospital.

From the accident, I realise my parents love me a lot as
my whole family flew to Australia to accompany me I used
to say walking 30 m is very far and I can't do it but I
have tried and though it's tiring. I have succeeded!

I hope that all patients can work hard and never say no.

I will like to get through the marriage customs and move
to my flat with my husband soon.

Best wishes
