

TTSH Earth Day Project Showcase

Who is Plaspulp Union?

- Plaspulp Union, established in 1979 in Singapore, specialises in recycling solutions, trading services and innovative waste management

友联私人有限公司
PLASPULP UNION PTE LTD

Why Should I Care?

- Every minute, a truckload of plastic enters our oceans. This increases pollution, threatening marine life and ecosystems.

What is Plaspulp Union doing to help?

Plaspulp Union have partnered with TTSH to launch a plastic recycling collaboration to foster sustainable practices in 2024 within TTSH.

How is Waste being Recycled?

- Staff at Tan Tock Seng Hospital (TTSH) actively promote sustainability through dedicated recycling efforts, with a focus on proper plastic waste segregation

Designated collection point were set up for the separation of different plastics

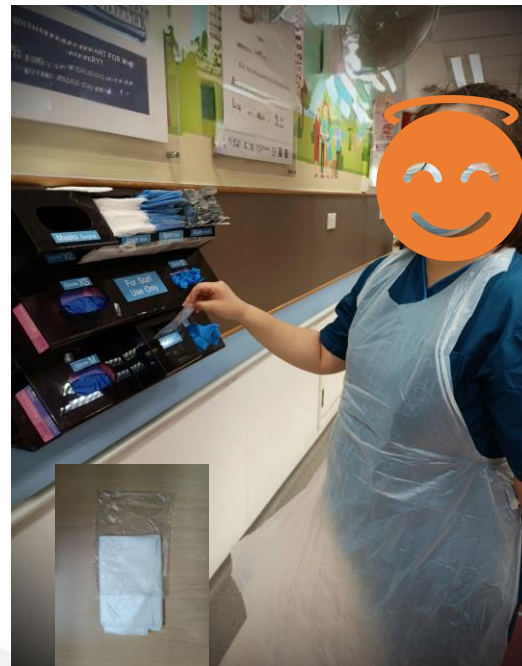

Examples of items which were collected for recycling

Cling wrap

Irrigation bottle and cap

Apron cover

How is Plastic being Recycled?

- Plastics collected from Tan Tock Seng Hospital undergo meticulous sorting by type and quality before being transported to our facility, where they are processed into high-grade resin through advanced recycling techniques

How the plastic being Recycled?

- This resin acts as a key ingredient in the manufacturing of new plastic products, contributing to a circular economy.
- By converting discarded plastics into valuable raw materials, this initiative reduces waste, conserves resources, and promotes sustainability.
- This collaboration embodies the shared vision of TTSH and Plaspulp Union to create a greener, more environmentally responsible future."

Plastic resins made from discarded plastics

How can you help?

- Identify recyclables at home and/ or workplace
- Separate recyclables and non-recyclable waste to make recycling more effective
- Rinse food and liquid residue from containers to avoid contamination

Thank You
