

Community Audiology @ AMKSC

Tan Tock Seng Hospital (TTSH) **Ang Mo Kio Specialist Centre (AMKSC)** provides basic hearing tests and hearing aid intervention in a community setting.

General Practitioners (GPs) can refer patients with hearing loss to AMKSC for assessment instead of going through a hospital ENT doctor. Patients can even self refer by making their appointments directly with AMKSC.

Patients found with complex hearing issues requiring further assessment are referred on to the ENT Outpatient Clinic at TTSH, or referred back to the GP for discussion of future management.

Audiology Services Include:

- **Hearing Diagnostic Package:** Otoscopy, Audiometry, Summary Report by an Audiologist
- **Hearing Aid Evaluation and Hearing Aid Fitting** if indicated
