Anaemia/ Thalassemia Screening Package \$300

Thalassemias are inherited blood disorders characterized by abnormal red blood cell production. Symptoms depend on the type of thalassemia and can vary from none to severe.

This screening aims to detect the most common types of thalassemias, as well as to exclude other non-genetic causes of anaemia like iron, folate or vitamin B12 deficiencies. People who are confirmed to have thalassemia will be given genetic counselling.

Anaemia/ Thalassemia Screening Package includes:

Biometric Parameters

Body Impedance Analysis

- Height & Weight
- Body Mass Index
- Waist Circumference

Blood Pressure

Laboratory Investigations

Haemoglobin Electrophoresis

The final diagnosis and recommendation will be delivered based on case findings, clinical investigations, medical history and personal profile.

- The health screening doctor reserves all rights to amend/remove any health screening component should the doctor deem the health screener unsuitable to conduct the health screening test, based on clinical judgment.
- All investigations included in the health screening programme are strictly non-exchangeable, non-refundable and have no redeemable cash value. The health screener will forfeit any of the investigations should he/she choose not to use the service during the health screening.
- All prices listed are subject to prevailing GST and change without prior notice.
