

ADVANCES IN SPINAL CORD INJURY REHABILITATION

Restoring **HOPE** Rebuilding **LIVES** Reliving **DREAMS**

Spinal cord injury (SCI) is a devastating neurological condition resulting from damage to the spinal cord, leading to dysfunction in motor, sensory, and autonomic functions; hence impacting the quality of life across multiple domains, including physical, psychological, and social well-being.

This webinar focuses on providing updates and insights into the latest advances in SCI rehabilitation. It will cover a range of topics related to SCI care and rehabilitation, such as the Ventilator Rehabilitation Unit (VRU), epidural spinal cord stimulation, sexuality management and adaptive sports.

TOPICS

VRU for Rehab
VRU Nursing: Specialised Skills in Chronic Ventilator Management
Adaptive Sports and rehabilitation
Spinal Cord Stimulation
Sexual rehabilitation and SCI
