About Amputee Support Group

Amputee Support Group (ASG) was founded in 2010 and is a collaboration between Ang Mo Kio-Thye Hua Kwan Hospital, Care and Counselling Department and Tan Tock Seng Hospital Rehabilitation Centre. Persons with amputation come from different walks of life with different stories leading to the amputation of their limb(s).

Our Mission

The ASG aims to help persons with amputation maintain a social support network, by addressing their psychosocial needs and reduce social isolation. Many are socially isolated due to their disability.

What We Offer

1. Provide relevant information about amputation and offer helpful insight and encouragement during the members' recovery process.
2. Professionals effectively share with members information on health management after amputation.
3. A platform for the members to share issues and challenges faced in life after amputation.
4. Address the psychosocial needs of the members.
5. Establish and maintain a social support network for the members.
6. Provide information based on an individual's experiences and offer helpful insight during the recovery process through its Befriending services .

**"We are no different.
We just do things differently"**

- Hairon Bin Yus
ASG Member

Our Activities

Monthly Events / Sessions

Monthly events/ sessions are usually held on the last Friday or Saturday of the month. These includes social outings, adaptive sports sessions, as well as health talks and interactive sharing sessions. Befriending services also promote social bonding and sharing of coping and adjustment tips.
