Diabetes Screening Package \$530

Singapore has a high diabetes rate. Unfortunately many people either remain unaware of their condition or their diabetes is not well controlled. The most common complications of diabetes are kidney failure, blindness, limb amputations, heart attacks and strokes. This package screens for these common complications including a retinal eye photograph.

Diabetes Screening Package includes:

Biometric Parameters

Body Impedance Analysis
- Height & Weight
- Body Mass Index
- Waist Circumference
Blood Pressure

Laboratory Investigations

Glucose Screen
Cholesterol Screen
Kidney Function Panel
Urine Microalbumin

Other Investigations

Electrocardiogram (ECG)
Diabetic Retinal Photo
Chest X ray
Choose 1 of the following
Treadmill Stress Test or
CT Calcium Score

Terms and conditions:

- Medical advice and recommendation will be delivered based on case findings, clinical investigations, medical history and personal profile.
- The health screening doctor reserves all rights to amend/remove any health screening component should the doctor deem the health screener unsuitable to conduct the health screening test, based on clinical judgment.
- All investigations included in the health screening programme are strictly non-exchangeable, non-refundable and have no redeemable cash value. The health screener will forfeit any of the investigations should he/she choose not to use the service during the health screening.
- All prices listed are subject to prevailing GST and change without prior notice.
